

The Voice of the Child

What is The Voice of the Child?

This is a phrase used to describe the real involvement of children and young people. It does not only refer to what children say directly, although it is essential this is heard, but it refers to many other aspects of their presentation. It means seeing their experiences from their point of view and taking into account the child's daily lived experience. The phrase means more than simply seeking their views; is about enabling them to take as active a role as possible in decision making.

Other reviews highlighted that practitioners have listened to the child, but their reports and concerns were challenged or negated by other agencies, sometimes bolstering parents denial of the concerns
