

Nitrous oxide (laughing gas)

Not a laughing matter

Nitrous oxide is a colourless gas used in medicine as an anaesthetic.

Some people use it as a recreational drug.

Spot the signs and get help:

Burns

Dizziness

Confusion

Headaches

Paranoia

If someone you know is using nitrous oxide or other drugs **Compass** can help, www.compass.uk.org or **01788 578227**

Report antisocial behaviour to the police on **101**
